

## **Resolution No. 614**

### **EXTEND SERVICE CONNECTION PRESUMPTION TO BLAST SURVIVORS**

WHEREAS, the Global War on Terrorism has exposed more than 330,000 service members to diagnosable blast injuries, with thousands more going undiagnosed and untreated; and

WHEREAS, the nature of the conflict these men and women face is frequently guerrilla-style combat where the enemy is widely known to use improvised explosive devices (IEDs); and

WHEREAS, much of the attention has been focused on the apparent physical wounds, there are many unseen effects of blast trauma, which could include brain injuries, long-term hearing and balance issues, chronic pain, air embolisms, and injuries mistaken for personality disorders; and

WHEREAS, some effects associated with blast injuries may not become manifest immediately allowing the service member to return to the field, only to have their ability to fulfill their duty dramatically affected by the long-term effects of the blast; and

WHEREAS many injuries are difficult to diagnose and our men and women in uniform can suffer from these disabilities for many years after the blast; and

WHEREAS, a large number of veterans have been identified as having been diagnosed at VA medical centers with conditions possibly related to blast exposures since the start of the Global War on Terrorism; now, therefore

BE IT RESOLVED, by the Veterans of Foreign Wars of the United States, that we urge Congress to approve a presumption of service connection for conditions associated with blast exposure.
